“On the overall, firms are making more prompt payments as compared to the first two quarters of 2023. Partial payments have also been on the rise and have hit a one-year high. This is a good indication of the level of prudence which firms have displayed in optimizing their cashflows and managing their credit risks. However, payment delays for manufacturing and wholesale continue to deteriorate due largely to prolonged weakness in those sectors.” commented Ms. Audrey Chia, SCCB’s Chief Executive Officer.
